

Asheville Christian

ACADEMY

FOOTBALL CLUB APPLICATION FOR RETURNING PLAYERS

For non-ACA students. Must be full-time students.

Admissions-Registration Application

Please direct all application materials to the Admissions Office

PO Box 1089 Swannanoa, NC 28778 (fax) 828-581-2218 admissions@ashevillechristian.org

Step 1 – SUBMIT FORMS

Completed Application for Admission-Registration and submit a \$400.00 non-refundable registration fee for football. Checks should be made out to Asheville Christian Academy.
 Required Supplemental Forms - The following additional forms are necessary to complete your application file.
 □ The required supplemental form is included with this application packet and can also be found online at www.AshevilleChristian.org.
 Submit the following:

- o Copy of Birth Certificate
- o Copy of immunization records
- Physical signed by a licensed physician and other medical forms (attached)
- o Signed Application-Registration form & Partnership Agreement

Step 2 - INTERVIEW

Following receipt of complete application (with all supplemental materials), the Athletic Office will contact parents to set up a brief interview with the Athletic Director and Coach. Parent(s) and student applicant must attend.

ACA admits students of any race, color, national and ethnic origin to all rights, privileges, programs and activities generally accorded or made available to students at the school. It does not discriminate on the basis of race, color, national and ethnic origin in administration or its education policies, admissions policies, scholarship programs and athletic and other school-administered programs.

Statement of Faith (From Article II of By-Laws)

The basis of Asheville Christian Academy is the Word of God. In the light of this Word, we in our education program stand committed to the following:

The Bible is the Word of God, verbally inspired and inerrant as originally given, and is the supreme and final authority in faith and life.

God is Triune - one eternal God existing in three persons: Father, Son and Holy Spirit. Man is created in His image. Creation and providence are revelatory of Him.

Christ is God manifested in the flesh, born of a virgin. He lived a sinless life, suffered and died in our behalf; and He arose bodily from the grave, ascended, and is coming again in power and glory. Christ is the only mediator between God and man.

Regeneration by the Holy Spirit is absolutely fundamental to Christian life and should be basic in all preparation for life. By God's grace only and through faith alone are our children, and we saved from sin and its evil consequences.

The present ministry of the Holy Spirit is to indwell the Christian, enabling him to live a godly life.

There will be a bodily resurrection of both the saved and the lost; they that are saved unto the resurrection of life, and they that are lost unto the resurrection of damnation.

The spiritual unity of believers is in our Lord Jesus Christ.

Parents are responsible for the education of their children. To bring them up in the Lord, they, through the agency of a Board, employ teachers who give evidence of a born-again life and who manifest ability to educate children morally and intellectually in the light of God's Word.

The pupils, being images of God, must be subject to His sovereign rule in their lives. Creation and providence (that which is taught), being God-revealing, must be presented as such. Such teaching makes for God-consciousness without which no Christian teaching is possible.

The doctrines stated in the first nine sections of Article II are essential and indisputable. Some other doctrines have been debated by evangelical Christians over the centuries. It is the school's policy that students not be deprived of robust examination of any Biblical text, but it is always to be done with respectful consideration of the various historical interpretations. Additionally, a student raising a question concerning such a doctrine should be referred to his or her parents or pastor

Application for Admission-Registration (cont.)

Our By-Laws and Parent-Student Handbook, which contain statements on our policy regarding the definition of marriage and requirement for admission, clearly address Asheville Christian Academy's expectations of all Christian family enrollment partnerships. As stated in our By-Laws, "A Christian family is understood to mean a legally married man and woman, and their children, in which at least one (1) parent is in full agreement with the Biblical doctrines of the ACA Statement of Faith (Bylaws, Article II – see page 1). It is further understood that a 'Christian family' does not exist where there is cohabitation (living together) outside of legal marriage." In light of the above statement, does your family meet the standard for admission?

If you checked "no," please explain further:	☐ Yes ☐ No

2023-24 NCISAA CONSENT TO PARTICIPATE AND RELEASE FORM

THIS DOCUMENT MUST BE SIGNED BY THE STUDENT-ATHLETE OF A NCISAA MEMBER SCHOOL AND BY THE STUDENT'S PARENT(S)/LEGAL CUSTODIAN <u>BEFORE</u> PARTICIPATION. STUDENT-ATHLETES MAY NOT PARTICIPATE WITHOUT THE SIGNATURE OF THE STUDENT-ATHLETE AND PARENT(S)/LEGAL CUSTODIAN.

I acknowledge that my school is a member of the North Carolina Independent Schools Athletic Association (NCISAA) and must adhere to all regulations that govern interscholastic athletic programs, including, but not limited to, Federal and State laws, local conference regulations and those imposed by the NCISAA. I understand that local conference rules may be more stringent than the NCISAA and agree to follow the rules of my school and the NCISAA and to abide by their decisions. I acknowledge and understand that participation in interscholastic athletics is a privilege, not a right. I acknowledge that I understand all pertinent rules that apply to my student-athlete and my school. I understand that a copy of the NCISAA Handbook is available at NCISAA.org.

PARENTS, LEGAL CUSTODIANS OR STUDENT-ATHLETES WHO DO NOT WISH TO ACCEPT THE RISK DESCRIBED IN THIS WARNING SHOULD NOT SIGN THIS FORM. The student-athlete and parent(s)/legal custodian recognize that participation in interscholastic athletics involves some inherent risks for potentially severe injuries including, but not limited to: serious neck, head and spinal injuries, serious injury to virtually all bones, joints, ligaments, muscles, tendons, and other aspects of the musculoskeletal system, serious injury or impairment to other aspects of the body, exposure to viruses or effects to the general health and well-being of the child, and in rare cases death. It is impossible to eliminate all risks. Because of these inherent risks, the student-athlete and his/her parent(s)/legal custodian have a responsibility to help reduce that risk. Participants must obey all safety rules, report all physical and hygiene problems to their coaches, follow a proper conditioning program, and inspect their own equipment daily.

I authorize medical treatment should the need arise for such treatment while I or my child/ward ("student-athlete") is under the supervision of the member school. I consent to medical treatment for the student-athlete following an injury or illness suffered during practice and/or a contest. I understand that in the case of injury or illness requiring treatment by medical personnel and transportation to a health care facility, a reasonable attempt will be made to contact the parent(s)/legal custodian in the case of the student-athlete being a minor, but that, if necessary, the student-athlete will be treated and transported via any means, including but limited to an ambulance, to the nearest hospital. I further authorize the use or disclosure of my student-athlete's personally identifiable health information should treatment for illness or injury become necessary.

I understand all concussions are potentially serious and may result in complications including prolonged brain damage and death if not recognized and managed properly. Further, I understand that if my student is removed from a practice or competition due to a suspected concussion, he or she will be unable to return to participation that day. After that day, written authorization from a physician (M.D. or D.O.) or an athletic trainer working under the supervision of a physician will be required before the student is allowed to return to participation. I also acknowledge that I have received, read and signed the Gfeller- Waller Concussion Information Sheet.

I consent to the NCISAA's use of the herein named student's name, likeness, and athletic-related information in reports of contests, promotional literature of the Association and other materials and releases related to interscholastic athletics and grant the NCISAA the right to photograph and/or videotape the participant and further to use the participant's face, likeness, voice and appearance in connection with exhibitions, publicity, advertising, promotional and commercial materials without reservation or limitation. The NCISAA, however, is under no obligation to exercise said rights herein. I further consent to the disclosure, by the member school, to the NCISAA, upon its request, of all records relevant to the student-athlete's athletic eligibility including, but not limited to, their records relating to enrollment, attendance, academic standing, age, discipline, finances, residence and physical fitness. The student-athlete and parent(s)/legal custodian individually and on behalf of the student-athlete, hereby irrevocably, and unconditionally release, acquit, and discharge, without limitation, the NCISAA its officers, agents, attorneys, representatives and employees (collectively, the "Releasees") from any and all losses, claims, demands, actions and causes of action, obligations, damages, and costs or expenses of any nature (including attorney's fees) that the student and/or legal custodian incur or sustain to person, property or both, which arise out of, result from, occur during or are otherwise connected with the student-athlete's participation in interscholastic athletics if due to the ordinary negligence of the Releasees.

By signing this document, we acknowledge that we have read the above information and that we consent to participation by the herein named student-athlete. We understand that the authorizations and rights granted herein are voluntary and that we may revoke any or all of them at any time by submitting said revocation in writing to the student-athlete's member school. By doing so, however, we understand that the student-athlete would no longer be eligible for participation in interscholastic athletics.

Athletic Trainer Parent/Guardian Consent Form

Student's Name:
Student's Date of Birth:
I, as parent or guardian of the student identified above, hereby grant permission to any athletic trainer on site at any school sanctioned sports practice or competition to provide such treatment within the scope of professional services authorized for such athletic trainer as deemed necessary for a physical condition arising during or affecting participation in such event. I also grant permission to release medical information to the school, to the athletic trainer and ACA team physician or to any subsequent physician or other provider as necessary for treatment of the student identified herein. This authorization to release medical information does not encompass release of any information to the media or to any university or school except that in which the above-named student is enrolled. I acknowledge and agree that any such athletic trainer may use his or her own judgment in securing medical aid, including ambulance and other emergency services as a result of any injury during participation in a school sanctioned event. I specifically consent and agree that the above referenced athletic trainer may provide preventative care and treatment of athletic injuries and rehabilitation and reconditioning of athletic injuries. This consent will be valid for the 2023-2024 school year.
By signing below, I agree and acknowledge that I will hold harmless the athletic trainer, ACA team physician, and ACA. I also understand that the athletic trainer, ACA team physician, and ACA are not liable for any accident or injury that may occur during the student's participation in an athletic event. I understand that the athletic trainer is involved in the school athletic program providing the services under the direction of the ACA team physician. I agree that the athletic trainer and the ACA team physician are not responsible to provide athletic training services to any injuries that occur outside of the ACA athletic program.

Gfeller-Waller NCISAA Student-Athlete & Parent/Legal Custodian Concussion Information Sheet

What is a concussion? A concussion is an injury to the brain caused by a direct or indirect blow to the head. It results in your brain not working as it should. It may or may not cause you to black out or pass out. It can happen to you from a fall, a hit to the head, or a hit to the body that causes your head and your brain to move quickly back and forth.

How do I know if I have a concussion? There are many signs and symptoms that you may have following a concussion. A concussion can affect your thinking, the way your body feels, your mood, or your sleep. Here is what to look for:

Thinking/Remembering	Physical	Emotional/Mood	Sleep
Difficulty thinking clearly	Headache	Irritability-things bother you more easily	Sleeping more than usual
Taking longer to figure things out	Fuzzy or blurry vision	Sadness	Sleeping less than usual
Difficulty concentrating	Feeling sick to your stomach/queasy	Being more moody	Trouble falling asleep
Difficulty remembering new information	Vomiting/throwing up	- 10 M	Feeling tired
Sr	Dizziness	Feeling nervous or worried Crying more	P
	Balance problems	, 3	
	Sensitivity to noise or light		M

Table is adapted from the Centers for Disease Control and Prevention (http://www.cdc.gov/concussion/)

What should I do if I think I have a concussion? If you are having any of the signs or symptoms listed above, you should tell your parents, coach, athletic trainer or school nurse so they can get you the help you need. If a parent notices these symptoms, they should inform the school nurse or athletic trainer.

When should I be particularly concerned? If you have a headache that gets worse over time, you are unable to control your body, you throw up repeatedly or feel more and more sick to your stomach, or your words are coming out funny/slurred, you should let an adult like your parent or coach or teacher know right away, so they can get you the help you need before things get any worse.

What are some of the problems that may affect me after a concussion? You may have trouble in some of your classes at school or even with activities at home. If you continue to play or return to play too early with a concussion, you may have long term trouble remembering things or paying attention, headaches may last a long time, or personality changes can occur Once you have a concussion, you are more likely to have another concussion.

How do I know when it's ok to return to physical activity and my sport after a concussion? After telling your coach, your parents, and any medical personnel around that you think you have a concussion, you will probably be seen by a doctor trained in helping people with concussions. Your school and your parents can help you decide who is best to treat you and help to make the decision on when you should return to activity/play or practice. Your school will have a policy in place for how to treat concussions. You should not return to play or practice on the same day as your suspected concussion.

You should not have any symptoms at rest or during/after activity when you return to play, as this is a sign your brain has not recovered from the injury.

This information is provided to you by the UNC Matthew Gfeller Sport-Related TBI Research Center, North Carolina Medical Society, North Carolina Athletic Trainers' Association, Brain Injury Association of North Carolina, North Carolina Neuropsychological Society, and North Carolina High School Athletic Association, and North Carolina Independent School Athletic Association.

Gfeller-Waller NCHSAA Student-Athlete & Parent/Legal Custodian Concussion Statement Form

Instructions: The student athlete and his/her parent or legal custodian, must initial beside each statement acknowledging that they have read and understand the corresponding statement. The student-athlete should initial in the left column and the parent or legal custodian should initial in the right column. Some statements are applicable only to the student-athlete and should only be initialed by the student-athlete. This form must be completed for each student-athlete, even if there are multiple student-athletes in the household.

Student-A	Athlete Name: (please print)	
Parent/Le	egal Custodian Name(s): (please print)	
Student- Athlete Initials		Parent/Legal Custodian(s) Initials
	A concussion is a brain injury, which should be reported to my parent(s) or legal custodian(s), my or my child's coach(es), or a medical professional if one is available.	
	A concussion cannot be "seen." Some signs and symptoms might be present immediately; however, other symptoms can appear hours or days after an injury.	
	I will tell my parents, my coach and/or a medical professional about my injuries and illnesses.	Not Applicable
	If I think a teammate has a concussion, I should tell my coach(es), parent(s)/ legal custodian(s) or medical professional about the concussion.	Not Applicable
	I, or my child, will not return to play in a game or practice if a hit to my, or my child's, head or body causes any concussion-related symptoms.	
	I, or my child, will need written permission from a medical professional trained in concussion management to return to play or practice after a concussion.	A
	Based on the latest data, most concussions take days or weeks to get better. A concussion may not go away, right away. I realize that resolution from a concussion is a process that may require more than one medical visit.	
	I realize that ER/Urgent Care physicians will not provide clearance to return to play or practice, if seen immediately or shortly after the injury.	
	After a concussion, the brain needs time to heal. I understand that I or my child is much more likely to have another concussion or more serious brain injury if return to play or practice occurs before concussion symptoms go away.	
	Sometimes, repeat concussions can cause serious and long-lasting problems.	
	I have read the concussion symptoms listed on the Student-Athlete/ Parent Legal Custodian Concussion Information Sheet.	
	I have asked an adult and/or medical professional to explain any information contained in the Student-Athlete & Parent Concussion Statement Form or Information Sheet that I do not understand.	
	ng below, we agree that we have read and understand the information contained & Parent/Legal Custodian Concussion Statement Form, and have initialed approtement.

SUDDEN CARDIAC DEATH IN YOUNG ATHLETES INFORMATION FOR STUDENT-ATHLETES AND PARENTS/LEGAL CUSTODIANS

What is sudden cardiac death in the young athlete?

Sudden cardiac death is the result of an unexpected failure of proper heart function, usually during or immediately after exercise without trauma. Since the heart stops pumping adequately, the athlete quickly collapses, loses consciousness, and ultimately dies unless normal heart rhythm is restored using an automatic external defibrillator (AED).

How common is sudden death in young athletes?

Rare. About 100 such deaths are reported in the US per year. The chance of death occurring to any individual high school athlete is about 1 in 200,000/year. Sudden cardiac death is more common in males than females; in football and basketball than in other sports; and in African Americans than in other races and ethnic groups.

What are the most common causes?

Research suggests that the main cause of is a loss of proper heart rhythm, causing the heart to quiver instead of pumping blood to the brain and the body. This is called ventricular fibrillation and is caused by one of several cardiovascular abnormalities and electrical diseases of the heart that may go unnoticed in healthy appearing athletes. The most common cause is hypertrophic cardiomyopathy, which is a disease of the heart with abnormal thickening of the heart muscle which can cause rhythm problems and blockages to blood flow. This is a genetic disease that may run in families and gradually develop over many years. The second most common cause is congenital abnormalities of the coronary arteries in which the blood vessels supplying the heart are formed abnormally. Other causes include myocarditis (inflammation of the heart, usually due to a virus), dilated cardiomyopathy (enlargement of the heart, often for unknown reasons), long QT syndrome and other electrical abnormalities of the heart, and Marfan syndrome (an inherited disorder involving abnormalities of the heart valves and major arteries, often seen in unusually tall athletes).

Are there warning signs to watch for?

Yes, in more than 1/3 of these sudden cardiac deaths, there were warning signs that were not reported or taken seriously. These include:

- History of a heart murmur
- Chest pains, at rest or during exertion
- Fatigue or tiring more quickly than peers
- Dizziness or lightheadedness, especially during exertion
- Fainting, seizure, or convulsions during physical activity
- Being unable to keep up with friends due to shortness of breath (labored breathing)
- Fainting or seizures during emotional excitement, emotional distress, or being startled
- Palpitations-awareness of the heart beating unusually (skipping, irregular, or extra beats) during athletics or cool down periods after athletic participation
- Family history of sudden death during physical activity or during a seizure
- Family history of sudden, unexpected death before age 50

• Family history of cardiac or aortic disease under 50 years of age

When should a student athlete see a heart specialist?

If the primary care provider or school physician has concerns, referral to a pediatric cardiologist is recommended. This specialist will perform a more thorough evaluation, including an electrocardiogram (ECG), which is a graph of the electrical activity of the heart. An echocardiogram (ECHO), which is an ultrasound of the heart to allow for direct visualization of the heart structure may also be done. Other possible tests include a treadmill exercise test and monitor to enable longer recording of heart rhythm. None of the testing is invasive or uncomfortable.

Can sudden cardiac death be prevented through proper screening?

A proper evaluation should find most, but not all, conditions that would cause sudden death in the athlete. That is because some diseases are difficult to uncover and may only develop later in life. Others can develop following a normal screening evaluation, such as an infection of the heart muscle from a virus. That is why screening evaluations and a review of the family health history need to be performed on a yearly basis. With proper screening and evaluation, most cases can be identified and prevented.
